About the Panel

Join us for an enlightening and interactive event highlighting the crucial role of effective communication in the biometric field. As a biostatistician, mastering communication can significantly boost your influence, drive impactful collaborations, secure cross-functional support, and advance your career. Our panel of esteemed industry leaders and communication experts will share valuable experiences and practical advice on leveraging communication for professional and organizational success.

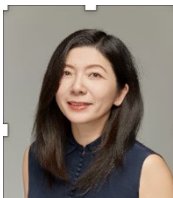

About the Panelists

Dr. Rui (Sammi) Tang, pharmaceutical executive with extensive experience across the drug development spectrum, from preclinical research to market access, with a focus on Innovation including on AI/ML-driven innovation in drug development processes. As the VP, Global Head Biometrics at Servier, Sammi shapes the company's data strategic direction and leads all teams in quantitative medicine-driven drug development, data strategy & stewardship, biostatistics, programming, and medical writing.

Dr. Xun Chen, Global Head of Biostatistics at Sanofi, a leading Pharmaceutical Company in the world. Xun oversees the statistical strategy and execution in the full life cycle of drug development at Sanofi, covering a variety of therapeutic areas, including Immunology, Oncology, Neurology, Rare disease, Rare blood disorder and Diabetes etc. Xun has always been passionate about promoting statistical leadership in the pharma industry to efficiently bring more effective treatments to patients.

Lei Wang, President and Managing partner at The Lotus Group, the recruiting firm for biometric positions. Lei was a statistical analyst at Northwestern University and AbbVie before she became a recruiter. She has been recruiting in the pharmaceutical/biotech industry for the last 20 years. She became a member of the Women Presidents Organization in 2020 and led The Lotus Group to become one of the 50 fastest growing women-owned businesses in 2020.

About the Facilitator

Helena Fan, co-founder of The Lotus Group, the leading recruitment firm for biometric professionals in the life science industry. With an MBA from the University of Southern California and a Master's in Public Health from West China University of Medical Science in China. Helena brings a wealth of knowledge and expertise accumulated over her impressive 20-year career in the staffing industry.
